2010 NACCTEP PRE-CONFERENCE

2010 Faculty Institute in NASA Earth and Space Science Education (FINESSE)

This free two-day workshop is to assist community college faculty in preparing future teachers in science education. NASA Earth and space scientists and educators share authentic inquiry activities, data, and resources related to key topics from the national science standards. The NACCTEP pre-conference institute in 2010 will include a focus on NASA Earth science data and the theme of climate change. Participants receive a $300 stipend, lunches, and more.

- Explore standards-based concepts using authentic inquiry
- Discuss current science research with NASA scientists
- Identify ways to address Earth and space science misconceptions
- Explore collaboration plans with colleagues
